

1. Nonwarranty and conditions of use

No liability whatsoever will be accepted for the eCI@ss standard, its numbering system, keywords or property lists. This particularly applies to the use and any damage that may result from this. The classification in no way claims to be complete, particularly as it is subject to a continuous updating process due to the industry's innovation processes.

eCI@ss is being published on the eCI@ss DownloadPortal. The use of eCI@ss is only permitted in acceptance of the eCI@ss Terms of Use. These can be found at <http://www.eclassdownload.com/catalog/conditions.php?language=en>.

2. General information about eCI@ss

Using a „common language“, which is understandable for both man and machine, is mandatory for a successful electronic and automated communication.

With eCI@ss a common language available: a global, cross-industry standard for classification and unambiguous description of products and services, which is conform to international and national standards. By using eCI@ss within the entire supply chain – from development to disposal - internal business processes as well as data exchange with business partners are optimized in a much more efficient way.

eCI@ss is developed by the association eCI@ss e.V., a non-profit organization, which is supported by ordinary and sponsoring members from companies, associations and institutions. Their common goal is to enhance eCI@ss in accordance with current and future market requirements as well as to promote its international use. Members of the eCI@ss association come from international companies from different industries (e.g. automotive, chemical and electrical engineering, utilities, service and trade).

You can find up-to-date information on <http://www.eclass.eu>.

3. Description of the files

The ZIP-file contains all relevant files for the class structure of eCI@ss 8.1 ADVANCED.

Starting with eCI@ss Release 7.0, there are two different versions of eCI@ss which contain the same classes, but differ in the product description on the basis of properties and values:

- BASIC (in .csv or .xml format). The BASIC version contains only the content that could be represented in a .csv format that was the exclusively used export format before 7.0. Therefore, it does not contain property block structures nor dynamic elements as in the ADVANCED version. BASIC does contain all classes of the ADVANCED, but the product description with the help of properties and values is structured a lot easier. BASIC is therefore a subset of ADVANCED.
- ADVANCED (in .xml format). The ADVANCED version is the leading version and built on the basis of the data model ISO13584. It contains all structural elements of the eCI@ss classification system including property blocks, dynamic elements such as reference properties, polymorphism and cardinality blocks. Each classification class refers to both an ADVANCED and a BASIC application class that contains the product description with the help of properties and values. The ADVANCED version contains the complete eCI@ss content.

Format of the data sets:

eCI@ss XML 2.0 (contains OntoML, see ISO 13584-32:2010, with a few optional enhancements), Encoding: UTF-8, Read-Me-File/Terms of use: PDF

XML-Scheme:

The description of the used XML scheme is available here

<http://www.eclass.eu/static/eClassXML/2.0/eCI@ssXML/dictionary.xsd>

or to be found in the eCI@ss wiki: http://wiki.eclass.eu/wiki/ISO_13584-32_ontoML

Content of the data sets:

eCI@ss Release 8.1 ADVANCED – English

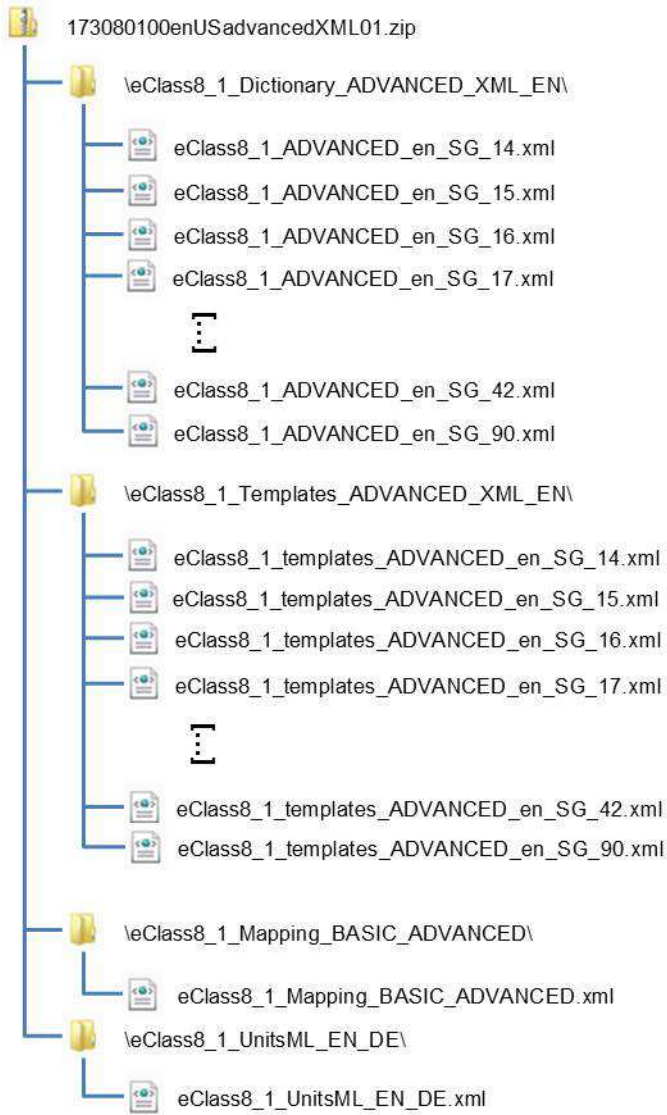

For each segment two .xml files are included:

- an .xml file that contains the eCI@ss dictionary ADVANCED
- an .xml file that contains the corresponding templates for ADVANCED. Templates implement a data requirement statement for the data exchange so that a data sender and a receiver can define e.g. orders, mandatory and optional fields etc. More information in the template scheme:

<http://www.eclass.eu/static/eClassXML/2.0/eCI@ssXML/template.xsd> or in the eCI@ss Wiki:

4. Support: Authorized eCl@ss IT Service Providers

During the introduction of eCl@ss, questions frequently occur on the concrete implementation of eCl@ss into various IT systems. Often not all questions can be answered with own resources, so that it turned out to be useful to access external know-how on some issues.

The authorized eCl@ss-service-providers and the eCl@ss e.V. support companies with consulting and offer software solutions for the introduction of eCl@ss in the company and thus sustainably promote the distribution of eCl@ss.

All service providers assigned with implementing tasks defined by the eCl@ss association, guarantee to observe the current rules, guidelines and requirements of the eCl@ss e.V. regarding the eCl@ss data model based on international standards. All information concerning the eCl@ss-service-providers is available on www.eclass.de.

The individual service offers can be viewed on the following link:
